You can record your macros on the computer using the keyboard macro recorder. The program will store keystrokes into a text file and save the file in the default location where you configured it. You can customize the name of the file, the location where it will save and the current text to be recorded. KEYMACRO advanced features: * Record mouse clicks; * Record screen; * Show and hide buttons in the recording session. Screenshot: Pin4Ever Screenshot Security Notice The developer of the extension pin4ever has updated the extension on Dec. 1, 2013 and the installer has changed for the worse. The new version creates a new folder "conf" and adds 3 new files to it. The worst thing is that the extension is downloading the following file: "5.5.1.2.0.1.0.1.7.zip" to the app folder and can not be removed. The old version allowed me to uninstall it without a problem. Security Update 1 : I tried to create a small text file in the pin4ever folder and it worked. I also tried to delete the new file "conf\5.5.1.2.0.1.0.1.7.zip" but it didn't work. I tried also to create a new pin4ever folder in the same folder as the original one but it didn't work. Fix: After a lot of trials I found a solution. If you have a download link for pin4ever, this will work. You can also use the link in my reply above, but it will not work 100%. Screenshot Security Notice The developer of the extension pin4ever has updated the extension on Jan. 10, 2014 and the installer has changed for the worse. The new version creates a new folder "conf" and adds 3 new files to it. The worst thing is that the extension is downloading the following file: "5.6.1.1.0.1.0.1.3.zip" to the app folder and can not be removed. The old version allowed me to uninstall it without a problem. Security Update 1 : I tried to create a small text file in the pin4ever folder and it worked. I also tried to delete the new file "conf\5.6.1.1.0.1.0.1.3 70238732e0
