A: The error indicates that the CAB file could not be opened. The most common reason for this is that the file is corrupted. Perhaps a malware or a virus was scanning and exfiltrating the data to a hacker's location. Also, maybe the data was corrupted or deleted. As you mentioned that it happens rarely, this is the most common reason. It happens when a file is opened, but before it is actually opened and read by the application. This happens when the application is interrupted and returns to the desktop. However, as soon as the application returns to the desktop, the file is closed, so it can't be opened. So, the solution would be to scan the computer for malware, and also make sure that it doesn't have a virus. Once that is done, the file can be opened again. Q: Vue-router to parameter route prefix I have a route, and it needs a routePrefix param like so: { path: '/:routePrefix/path', component: Page } How do I send the routePrefix value as a param to the component? I've tried: path: '/:routePrefix/:path', But it didn't like that either. A: Have you tried path: ':routePrefix/:path? The problem with your second code snippet is that :routePrefix is an inline string literal, which is invalid. If you wish to use the string as a named constant, you should use the following syntax instead: path: 'routePrefix/:path?', Q: Find $\lim \limits_{n \to \infty} (\frac{2}{3})^{2n} (\frac{3}{4})^{2n}$ Find $$\lim_{n \to \infty} (\frac{2}{3})^{2n} (\frac{3}{4})^{2n}$$ I don't know how to solve this? A: You have that $$(\frac{2}{3})^{2n} (\frac{3}{4})^{2n}=\left(\frac{2}{3}\right)^{2n} (\frac{4}{3})^{2n}=\left(\frac{$$

How to install drivers for Motorola Moto Z Play. belkin f5d8055 v2 driver kernel verison:4.10.0-38-genericwhere can i download the belkin f5d8055 v2 driver.i have a windows 8.1 64bit desktop.
