

5 days ago Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows Server 2008, and Windows Server 2012. From Windows Loader, you can activate all of them..Q: Get date format string from a specified DateTime I am trying to store a format string that represents a specific date format. I am trying to use: string datetime\_format = DateTime.Now.ToString("MM-dd-yyyy"); However this is giving me: String was not recognized as a valid DateTime. Can anyone help please? Thanks A: That is because the string "MM-dd-yyyy" contains a - which cannot be used in a DateTime. You need to escape that character with another -, as in "MM\\-dd\\-yyyy" If you just want the format of the string, you can just use DateTime.Now.ToString("MM\\-dd\\-yyyy"); // Copyright 2016 Google LLC // // Licensed under the Apache License, Version 2.0 (the "License"); // you may not use this file except in compliance with the License. // You may obtain a copy of the License at // // // Unless required by applicable law or agreed to in writing, software // distributed under the License is distributed on an "AS IS" BASIS, // WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. // See the License for the specific language governing permissions and // limitations under the License. package logging import ( "strings" "testing" "github.com/golang/glog" ) func TestParseLogLevel(t \*testing.T) { var tests = []struct { logName string level string want string }{ { "error", "INFO", "LOG\_NAME\_ERROR", }, { "warning", "INFO", "LOG\_NAME
