I have a Singleton class that uses a resource dictionary to assign resources for my application. I want to ensure that I initialize this single instance the right way so that the application initialization is as quick as possible. Here is my singleton class: public class SearchProcessor : ISearchProcessor { private static readonly SearchProcessor _instance; private static Dictionary _resourceDictionary; private static ResourceDictionary _resourceDictionaryRes; public static SearchProcessor Instance { get { if (_instance == null) { lock (_resourceDictionaryRes) {
