Common utils and applications not installed in your system, right click to install the missing software and enjoy: HDM-4: The Highway Development and Management Model (HDM-4) is a software system for evaluating options for investing in road transport infrastructure. The

highway department in any country will use a software program to develop and implement a strategic investment plan for the road system. The software allows an intelligent decision to be made in the area of road planning and design. An investment project can be assessed on the basis of the road user cost per kilometer. The road user cost includes the cost for maintenance and repair, repair of damaged and excavated roads,

and the cost of additional travel time and fuel consumed during a traffic breakdown. It also covers the costs of construction of new access roads and the upgrade of existing roads, as well as costs of servicing and maintaining roads and bridges. hdm 4 software free download HDM-4 is a model developed by the Road User Costs Model (RUC) Project Group within the World Bank's World Development Report No. 21: "Highways and Transport

Infrastructure". The highway department in any country will use a software program to develop and implement a strategic investment plan for the road system. The software allows an intelligent decision to be made in the area of road planning and design. An investment project can be assessed on the basis of the road user cost per kilometer. The road user cost includes the cost for maintenance and repair, repair of damaged and excavated

roads, and the cost of additional travel time and fuel consumed during a traffic breakdown. It also covers the costs of construction of new access roads and the upgrade of existing roads, as well as costs of servicing and maintaining roads and bridges. Licensed to you for free.
