CSI Detail Product History CSI MAT: Version 10.6 Released in May 2018. CSI MAT (Medical Applications) is a complete medical diagnostic imaging software package that combines the most advanced features of medical image management (MRI, PET, CT, US, etc.) and image-based analysis (speech and language, cardiovascular, neurology, etc.) software with a focus on the critical role of the radiologist. CSI MAT is ideal for smaller companies as a basic solution for image-based diagnosis, or for large companies with a need for a complete medical image management solution, as it provides the best combination of functionality, price, performance, and features. CSI MAT is ability to meet that need is further enhanced by the fact that CSI MAT is not just a product, but a set of ready-to-run applications. This means that the end-user has the flexibility of rapidly deploying the CSI MAT solution on any of several platforms without requiring a major programming effort. CSI MAT v18.0.0 build 1034 x64 is an advanced medical image management software package that combines the most advanced features of medical image management solution, as it provides the best combination of functionality, price, performance, and features. CSI MAT is ideal for smaller companies as a basic solution for image-based diagnosis, or for large companies with a need for a more powerful image-based diagnosis, solution. CSI MAT is ideal for smaller companies as a basic solution for image-based diagnosis, or for large companies with a need for a more powerful image-based diagnosis, or for large companies with a need for a more powerful image-based diagnosis solution. CSI MAT is ability to meet that need is further enhanced by the fact that CSI MAT is not just a product, but a set of ready-to-run applications. This means that the end-user has the flexibility of rapidly deploying the CSI MAT v18.0.0 build 1034 x64 is an advanced medical image management software package that combines the most advanced features of medical image management (MRI, PET, CT, US, etc.)
