I am not sure what is the best practice to get the status bar (status bar for devices) I have tried to find how to do it. I have a button and then I want to do the following. 1) If the user touches on the button, I will get the status bar 2) If the user clicks on the status bar, I will make an animation Please help me with this and also teach me about best practice. Thanks A: The status bar is accessible by using getWindow().getStatusBar(); To display it you have to set an attribute to that object. For example to display the animation you can use window.setStatusBarColor(getResources().getColor(R.color.orange)); Q: Writing out a file line by line in ruby I am trying to write out some stats to a file line by line, here is my code: puts "This is the first line of the file " file1.each {|line| puts line.to_s} The problem is that it is writing out this: This is the first line of the file This is the second line of the file This is the third line of the file How do I get it to write out a line like this? This is the first line of the file This is the second line of the file This is the third line of the file Thanks, I am really new to ruby and I am stuck 2d92ce491b
