Category:Software for Cinematography Category:Film and video technology Category:Computational photography Category:American inventions1. Technical Field The present disclosure relates to communication devices, and more particularly to a wireless communication device and an external antenna detection method thereof. 2. Description of Related Art External antennas are often mounted to a wireless communication device for receiving and transmitting signals. However, external antennas cannot be inserted into the internal space of the wireless communication device. In addition, positioning the external antenna in the wireless communication device must be performed by hand. This can be complicated, time-consuming, and inefficient. 2d92ce491b
