. Can I still find a Pma review for the PMA (Civil Service). Pma Entrance Exam Reviewer Pdf 816 1/4 2/4 Pma Entrance Exam Reviewer Pdf 816 3/4 Civil Service Exam Reviewer Fr. 878 144 323KB Read more .Q: SQL Server INSERT.. SELECT MSDN example What is MSDN example of INSERT.. SELECT? SELECT * INTO #Test FROM Table WHERE Id = 123; INSERT INTO #Test SELECT * FROM Table WHERE Id = 123; SELECT * FROM #Test; A: Here you go, it is my first try :-) Syntax INSERT INTO #Test SELECT * FROM Table WHERE Id = 123 Explanation The main reason to use an INSERT... SELECT statement is to avoid the overhead associated with a full table scan during INSERT operations. When you use an INSERT statement to insert a new row into a table, SQL Server must perform a table scan to find every row in the table before inserting the new row. This table scan can be a performance bottleneck when inserting a large number of rows. The INSERT... SELECT statement reduces this overhead by using the SELECT statement to define an intermediate temporary table and then inserting the rows of the source table into the table defined by the SELECT statement. By using an INSERT... SELECT statement, there is no overhead associated with a table scan when inserting data into a table. Important Considerations When executing an INSERT... SELECT statement that has multiple tables as source tables and a single table as the destination table, the table defined by the SELECT statement becomes the destination table. This action disassociates the data in the tables from the tables that the data is logically associated with. To avoid problems that can result from this action, perform the following steps when using an INSERT... SELECT statement to insert data into a table: Select the columns to be inserted into the destination table. Specify the destination table in the INSERT statement. The destination table must have the same number of columns as the source tables. Specify the columns in the INSERT statement of the destination table as a subset of the columns to be inserted. Specify the primary 3ef4e8ef8d
