TopNews California Trucking Association Executive Director Discusses Trucking Industry's Political Future Last week the California Trucking Association released a new report on the political future of the trucking industry in California. In a survey of its members, the group's executive director, Herb Block, highlighted the key findings of that report, which also discussed the potential impact of a \$1,000-per-trip diesel fuel tax on the industry. In the report, Block and his colleagues note that the industry is facing a number of challenges, including poor economic conditions, an antiquated regulatory system, and the potential impacts of a higher diesel fuel tax. "Our position remains that whatever reform package is passed should include an excise tax," Block said. "The problem is that all the attention and the discussion have been focused on repeal rather than fixing the existing system. The industry is prepared to look at any tax and its impact, but it is the entire regulatory framework that must be addressed." Block also discussed the potential impact of a higher diesel fuel tax. "The average consumer will see no increase in the cost of a gallon of diesel fuel," he said. "The diesel fuel tax is a regressive tax. Most of the burden falls on lower income drivers. Since the average consumer gets very little benefit from the diesel fuel tax, we see the real impact as being less than a penny a gallon." Block added, "We are already collecting the fuel tax for state and federal taxes, and the industry is making sure that this is collected accurately. Any new fuel tax must provide a rebate for consumers to recover the new
