Category:American magazines Category:American weekly magazines Category:Defunct magazines of the United States Category:Magazines established in 1937 Category:Magazines disestablished in 1972 Category:Magazines published in New York City Category:Professional and trade magazines Category:Pulp magazines--- abstract: | The purpose of this paper is to present an implementation of mixed finite element methods for time-dependent coupled bulk viscous fluid and elasticity problems in parallel. The method is first derived from the general theory of weak solutions of time-dependent problems. It is then presented as a collection of algebraic equations to be solved using a parallelized linear algebra solver (LAPACK). A detailed description of the implementation and how to deal with boundary conditions is presented. Numerical tests are then presented to illustrate the efficiency of the approach. [\*\*Keywords.\*\*\*]{} Coupled bulk viscous fluid and elasticity, time-dependent problem, FFT, parallel, domain decomposition, two-dimensional. author: - | Marie-Claude Jourdan[^1], Dominique Mallein[^2]\ [Laboratoire de Mathématiques Appliquées de Rennes (LMA-Rennes)]{} Université de Rennes 1, UMR 6625 CNRS, Campus de Beaulieu,\ 35042 Rennes Cedex, France\ [ma.jourdan@lma.univ-rennes1.fr]{} [souad.dm@gmail.com]{} bibliography: - 'biblio.bib' title: A parallelized time-dependent mixed finite element method for coupled fluid and elasticity --- [^1]: LMA-Rennes, École Centrale de Rennes, France. [^2]: LMA-Rennes, École Centrale de Rennes, France. Q: What are the characteristics of a good, valid scientific problem? I was recently asked to weigh in on a question that is apparently being closed as "too broad" and "primarily opinion based". The question has one answer by a user who is cited as the community's expert. It 2d92ce491b
