
KEYMACRO is an application which supports OS X and Windows platforms for adding a new keyboard shortcut to your application with a single click. Its major feature is the ability to add keyboard shortcut to any app by just one click. To use the app, you just need to add your desired keyboard shortcut, which can be any combination of keyboard keys. Then, you just need to click the add button to add the keyboard shortcut. You can then select what action the keyboard shortcut performs and how many times it repeats. Wu Xiaofan opened his YouTube channel in December 2016. In January 2018, he began posting game videos on his channel, and has since gained a large following. By June, he had released over 25 titles. In September, Xiaofan announced that he was taking a break from streaming to focus on his new career and stream on a smaller scale. He also created a Facebook and a Twitter to share videos with his community and interact with them. Did you like our videos? Remember to subscribe to our channel if you want to see more future videos.
