Hacker Refresh (Nice Passwords) [PC World] 3. instead of . vcrf6kl0vvc2cu3tn23usnlwt29za0s7dmtddin6a4sev1vvsnj0utg1tte2ov0sh0c5e7n7tgq0h0r0in3t12d0020vn00u05470910001Q: How to unload previous scene in Cocos2d I'm creating a simple game with Cocos2d, using a scene to control enemy movement. The problem I'm having is that when you tap the screen, the scene is loaded again. I don't want that to happen; I want the previous scene to be loaded (with the enemy on it) but it's not working. I'm using the following code: GameLayer *gameLayer = [GameLayer node]; CCScene *gameScene = [GameLayer node]; [gameLayer replaceScene:gameScene]; Then I use the CCScene methods to control enemy movement. Here is my scene method (where I run through all the scene nodes): -(void) onEnter { [super onEnter]; CCScene *scene = [CCScene node]; self.mainLayer = [CCLayer node]; [scene addChild:self.mainLayer]; CCNode *enemy = [CCNode node]; enemy.position = ccp(120,120); enemy.scale = 0.5f; [scene addChild:enemy]; enemy.physicsBody = [CCPhysicsBody bodyWithCircleOfRadius:enemy.contentSize.width / 2
