I had to download the recovery.zip from here -> Download oneclickrecovery-v0.4.zip from here. Step 1: Install ARM version of Android SDK by referring to this step -> Step 2: Place oneclickrecovery-v0.4.zip in your tablet /sdcard/Downloads directory. Step 3: Connect your tablet to a USB port on your PC using a data-dongle or some other USB device. Step 4: Launch the recovery and follow the on-screen instructions. Step 5: Select the "Choose zip from sdcard" option on the main screen of the recovery. Step 6: Select the.zip file for flashing. Step 7: The tablet will be rebooted a couple of times. If after a while, you do not see the Android Boot screen with the Google Logo, simply repeat the previous step. The Android boot screen will eventually appear. If it does not appear, please remove the data-dongle from the PC and re-try. Happy flashing! The impact of leukocytosis on survival outcomes in patients with metastatic breast cancer. The purpose of this study was to assess the impact of leukocytosis on survival outcomes in patients with metastatic breast cancer (MBC). Medical records of adult women with MBC (n=7,051) from two independent Phase II clinical trials who were enrolled in the Tumor Molecular Analysis for Therapeutic Choice (TAMCAT) registry between 2000 and 2004 were reviewed. Univariate analyses were performed to assess the relationship of leukocytosis with overall survival (OS), progression-free survival (PFS) and duration of response to therapy. Leukocytosis was associated with older age, elevated alk d4474df7b8
