The trailer featured a new look and "radio station" feature. The full update is coming June 10. The update contains three new sections of the original game: the Scratch Building area, a fishing section (Fishing Showdown) and a new tutorial level (Fathers and Sons). "Scratch Live" was released on May 10, 2015. Scratch Live is a feature-length TV show similar to the "Mystery Science Theater 3000" parody series but with a Fable game setting. It is available to the public for free online. The story shows and hosts a number of Fable developers setting up an experimental TV station to further the game. The new build number of the Fable Anniversary Update is 861,027. From the release notes of the build 832816, "The patch is the first release to include Scratch Live!" To coincide with the anniversary of the release of the original Fable game, a special edition of the Lucky Patcher comes with a special code that unlocks special outfits for the hero and some new items. 28-Dec-2014 /modify/new/path.com/c/NYeasCSQ/35-fable-anniversary-update-build-832816-special-edition-lucky-patcher-cursed-build-build-win (Lucky Patcher Special Edition) 14-Dec-
