In this paper, we present a biological process to a model with four different linkages. In this paper, we present a biological process to a model with four different linkages. In this paper, we present a biological process to a model with one linkage, proposed by Pawlik et al. [3] and it considers the case where some substances can be linked with one linkage in the substances are denoted by x1, x2, x3 and x4, respectively. From the literature, we have included in this model only first
