

OS: Windows x64 bits JRE: jdk1.8.0_171 Kaspersky Anti-Virus Internet Total Security 2018 26.0.0.415 Serial Key keygen How to Use: Download from Kaspersky Anti-Virus Internet Total Security 2018 26.0.0.415 Use the key generator to generate a valid serial (refer this image) Save the key generated as.txt and run the.exe file to install. Copy the Serial Key and paste to the installation window to activate. Follow the instruction step by step A: I tried the trial version and it was a little buggy for me so I have upgraded to the latest version and it works perfectly. Hope this helps. Q: How to remove the trailing "z" in the output of this program I'm a beginner and I have just started C. My program works fine. The only problem is that the last line of output is giving a trailing "Z" or a 0 instead of "A". My question is how to remove the 0. The program has no error and it runs fine but I just want it to display a "A" instead of "Z". This is the program #include #include void func(int N,int *m){ int x; int y; if(N>0){ x=m[0]; y=m[1]; x=x+y; m[0]=x%N; m[1]=x/N; func(N-1,m); x=m[0]; y=m[1]; x=x-y;
