
KeyMacro AntiSpyware is a computer security program intended mainly to keep your computer free from spies, viruses, worms and all the other threats circulating on the Internet. Keeping your PC free from these invisible dangers can be an irritating task, especially when they are of various types and you have to check them out one by one. The KeyMacro AntiSpyware program, on the other hand, will scan your PC, find all the threats, and give you a complete report on each of them. The program will do all this automatically, without your interference. You can even assign specific macros for various tasks. If you find the program interesting, then check out the KeyMacro User Guide to learn more about how to use the program and what it does. Installing and Uninstalling KeyMacro When you first run the program, it will give you a link to the KeyMacro User Guide. Click on this link to start reading the guide or to download the entire program on your PC. The download links have been provided in the Read Me file. Now that you have finished reading the guide, it's time to install the KeyMacro AntiSpyware program on your computer. When you start the KeyMacro AntiSpyware program for the first time, it will check if there are any problems with your PC. If there are, the program will alert you about it. You will be asked to solve the problems, or you can decide to use the Express Mode. If you do not have any problems with your PC, then click on the "Next" button to start the program. You will need to give your permission for the program to run. On the next screen, you will see the installed components and their status. It is now the time to decide which components to uninstall or remove from your PC. If you don't want to remove them, then click on the "None" button. If you decide to remove any of the components, then select them from the list. When you are done with your selection, click on the "OK" button to continue. The next screen will ask you if you want to clean your registry. If you select "Yes", then click on the "OK" button. When you are done with the cleaning, click on the "OK" button again 70238732e0

Macro recording without plugins! Simply press "Macro" in the preview and record your keystrokes or mouse clicks. Adjust Macro Speed and record a free running macro. The software uses a hidden tray icon for this, which hides itself when you aren't using it. Keyboard & Mouse recording: Use the mouse or keyboard to record the activities on your screen. (You can also use the menu to record, which is great if you don't know the menu shortcuts.) Record from anywhere in your screen: Record from any open window, the desktop, the middle of the screen, the button

in the top right corner, the menu bar, etc. (not just mouse clicks) Themes & skins: Use an exclusive theme or skin for your macro. It can even be changed in the interface. Free running macro: Record a free running macro. It's a macro that only records if the mouse or keyboard events happen. Keystroke & Mouse recording: Record an all-in-one macro that does keystrokes or mouse clicks or both. Macros in lists: You can record multiple macros in a list, which you can scroll through. Select lists: You can select multiple lists. Macro Speed: Adjust how fast the macros play back (or pause/resume). Custom Hotkeys: Customize your keystroke macros. Macro recording without plugins! Simply press "Macro" in the preview and record your keystrokes or mouse clicks. Adjust Macro Speed and record a free running macro. The software uses a hidden tray icon for this, which hides itself when you aren't using it. Keyboard & Mouse recording: Use the mouse or keyboard to record the activities on your screen. (You can also use the menu to record, which is great if you don't know the menu shortcuts.) Record from anywhere in your screen: Record from any open window, the desktop, the middle of the screen, the button in the top right corner, the menu bar, etc. (not just mouse clicks) Themes & skins: Use an exclusive theme or skin for your macro. It can even be changed in the interface. Free running macro: Record a free running macro. It's a macro that only records if the mouse or keyboard events happen. Keystroke & Mouse recording: Record an all-in-one macro that does keystrokes or mouse clicks or both.
