What's New in the BCWipe Total WipeOut?

Wipe out all data on a Hard Disk drive. BCWipe is a disk and file wiping tool, it can wipe a hard disk, floppy disk, CD-RW, DVD-RW, tape, JBLaq drive, USB drive, SD card, or any other removable media. It can also be used to wipe the contents of files in Windows registry and in the MFT-files on NTFS file systems, and on FAT file systems, as well as on file systems such as exFAT and FAT32. BCWipe is designed specifically to clean either the drive itself or its storage media, and it does this to a totally unrivalled level. This means it will leave all files, directories, and Windows system files exactly as they were before the wipe was performed. BCWipe enables users to wipe their disk drives on a fully automated basis. The utility can wipe an entire drive, just a single folder, and even a single file. It can wipe the entire volume, sector by sector, in a raw mode, or in accordance to a specific file. The user can also combine the wiping action with the running of any file or folder moving and copying programs. The user can also choose to run the wipe during system operation, before system start-up or shutdown, at a specified time, or even on demand. BCWipe's wipe engine is ASIC based and ASIC's with a 128k RAM and microprocessor enable BCWipe to provide incredible speed and reliable results. With a 14 day guarantee, and a free trial version available, BCWipe is available to protect against every conceivable threat that's been on the horizon. BCWipe has a built-in user-friendly interface that's capable of running from a LAN or even from a removable media. There is also a BIOS mode which enables the user to automatically wipe any drive that is connected to the system at system power-up. Additionally, there is a command line mode which enables the user to perform the wipe operation entirely through a terminal application. BCWipe is the first and only disk and file wiping tool in existence that can guarantee a complete wipe of every type of storage media and file systems without any trace being left on the drive. BCWipe Description: Cleaning a hard disk drive sector by sector, file by file, folder by folder, or entire volume is not something that can be done by any other solution. Re. Clean drive removal (1.1) BC
