What's New In QuickSearch?

This compact, stand-alone utility with optional Clarion source code / template will save you time and effort when searching your drives. FAST alternative to Windows File Search dialog. Automatically calculates CRC32 values. Supports windows text files, audio and video files, folders, and network drives. You can even search files, folders, text, and file contents, or do a binary search. A special "binary search" in special mode will highlight the file in the results list when you select the file using a file or folder shortcut. It will work in Windows 2000, Windows XP, Windows Vista, Windows 7, Windows 8, and Windows 10. It does not require Windows administrative privileges. QuickSearch After successful installation, you will see a small icon in the notification area - an analog clock under Windows 2000 and Windows XP and a digital clock under Windows Vista, Windows 7, Windows 8 and Windows 10. This icon represents the QuickSearch application. This application does not need to be run every time you run the file search utility. If you have changed the default location of the search results in Windows Explorer, you may have to run the QuickSearch utility. Otherwise, it will automatically calculate the CRC32 value in the first file search. Some available features of QuickSearch: - Search files in all drives and sub-drives, network drives, and CD/DVD - Search text inside files - Search text inside folders - Search contents in files - Search contents in folders - Create a shortcut to search results - QuickSearch when opened - QuickSearch with CPU usage monitoring - Analyze memory usage in the application - CPU usage monitor - Easy to use - Save time and effort - Create task for running application - Automatically calculate CRC32 values - Specify a file or folder to check on the same system - Specify a password - Specify the size of search data to search - Include directories in search - Include hidden files and folders - Search history - Analyze memory usage - Display CRC32 values - Display details in the search result files - Display FTP details - Open tab of results in file properties window - Open folder properties window - Open default location of search results in Windows Explorer - Calc CRC32 file - Calc CRC32 folder - Calc CRC32 files - Calc CRC32 folders - File contents search - File contents search text (ex: Search text in all
