Dup Scout Enterprise Torrent Free Download

Dup Scout Enterprise is a stand-alone desktop tool that discovers duplicate files, hard links, and shortcuts in a computer's directory tree. It locates duplicate content across all drives, servers, and remote servers on the network, and can quickly search the internet to locate new files as well. While the scanning is in progress, Dup Scout Enterprise notifies you when it finds duplicate files. You can, however, determine when the duplicate content is located and when it was last updated. After the scanning process, you can get a list of duplicates, or organize your content by category or file name. The software can search for duplicate content by a large number of unique categories, and by search criteria such as file size, creation date, and modifications. The scanned data is presented in a very detailed table, where you can sort by column and filter by the contents of any column in the table. If any error or missing item is detected, Dup Scout Enterprise will notify you by email. The data can be extracted to a database, or a series of reports can be generated that include detailed statistics about the duplicate content. DupliEyes - Look for duplicates in files right away DupliEyes is a tool that allows you to easily identify duplicates among a huge number of files and locate them quickly and easily. Whether it's big directories full of files or even the user's home directory, it will search through your files and detect the duplicates instantly. DupliEyes Features: 1. Identify duplicate files With our Free Duplicate File Finder you can easily identify duplicate files that you have on your computer or in your network. All duplicates are listed in a single list sorted by file size, name or creation date and you can see the actual size of duplicate files to save money on disk space. 2. Identify duplicate shortcuts All shortcuts are listed in a single list sorted by file size, name or creation date. The duplicates are marked with a red triangle and you can see the actual size of duplicates to save money on disk space. 3. Identify duplicate images, sound and video files All images, sounds and video files are listed in a single list sorted by file size, name or creation date. 4. Save time and disk space Duplication of both files and shortcuts is not only one of the most inefficient uses of hard drive space, it also wastes a lot of valuable time for you
