What's New in the?

Maintain, share, and collaborate on your drawings, even across multiple devices and locations. Draw, markup, and check-in directly from a mobile device. (video: 1:00 min.) Speak directly to your CAD model using AutoCAD's most natural and expressive drawing tools. Pause, stop, and undo in real time. (video: 1:23 min.) Download data-driven information from websites, web services, and social networks. Find drawings of the same product and add them to your drawing. Analyze your drawing data and generate reports and visuals. (video: 1:31 min.) Make changes to your drawings or annotations in seconds. Automatically generate drawings based on selected drawing parts or the last annotation. Save drawings as ZIP files. (video: 1:10 min.) Import and manage annotations from your browser. Track annotations and import them

directly into your drawing. (video: 1:31 min.) Interact with your model while you draw. Quickly add notes, dimensions, and other annotations as you draw. Make corrections and check-in drawings from anywhere. (video: 1:11 min.) Add interactivity to drawings with a mouse or stylus and turn static drawings into dynamic presentations and models. (video: 1:06 min.) Create drawings automatically based on design information. Generate drawings with all design information, including lines, colors, hatch, and patterns. (video: 1:26 min.) AutoCAD's integration with Microsoft Excel® is dramatically improved. You can edit a model spreadsheet and use a virtual mouse to select and view your drawing in Excel.

Instant Repairs: Streamline drawing and design work by instantly repairing your drawings. Scratch or repair lines based on existing parts of the drawing. (video: 1:05 min.)

Instant corrects. Automatically corrects your drawing based on parts you select in the drawing. Instant updates. Automatically update drawing parts and annotations based on the current state of the drawing. AutoCAD's underlying tools for creating drawings, such as the command menu, the drawing toolbar, and various drawing commands, are even more powerful. **A New View and Style Features** Animate your drawings for presentations and animations. Create and edit videos from a single file,

automatically add captions, and export
