Axialis IconWorkshop Crack

Want to make your icons look classy? Axialis IconWorkshop is a professional tool that lets you create, edit, and convert various types of icons. It provides you with dozens of effects, filters, and tools for customizing your icons. You can adjust the contrast, hue, saturation, and brightness, adjust the opacity, apply grayscale and shadow effects, zoom in and out, use hotkeys, as well as perform various editing operations (cut, copy, paste, delete), and copy the current item to the clipboard. You can also change the background, insert or replace images, and embed a variety of symbols. Use the color picker for choosing the desired color, use a color replacer for inserting a custom color, embed lines, rectangles, and ellipses, and fill in the desired area with a custom color. Finally, you can use a pencil for drawing lines and rectangles, and a brush for painting the desired area. When you're done, you can either change the icon for the Windows Vista's system settings by choosing normal or large icons, adjusting the space between icons, and displaying icons using 256 or true color. You can also customize any hard disk folder (or subdirectory) with the icon of your choice, change the icons for the Start Menu, desktop, and other options. Apps2Go Selecting the right mobile apps is not an easy task, especially in today's fast paced world of technology where apps are updated every day and offer the latest and greatest features, giving you the opportunity to customize your phone or tablet to the way you want. When you finally find that game-changing app, you want to know if it has a problem in the marketplace. Since apps can't be tested until they're approved by Apple, you don't know if it's been compromised. Apps2Go can scan your phone or tablet and find any apps that have been found to be in violation of the iTunes App Store Guidelines and the iOS Distribution Guidelines. Apps2Go Description: Apps2Go is the simplest way to search and download all the free, legal, and safe apps for your iPhone or iPad. It finds all the apps that have been approved by Apple and provides a list of them as a PDF file with all the app details including screenshots and descriptions. If you don't know how to install an app, just copy the download link and paste it in your device. It works with iPhones, iPads

All macros to make your life easier! License: Freeware iBackup 1.7.2.0 iBackup is a backup program which runs in the background and is capable of backing up your files and data to a remote FTP server. The software is both secure and powerful. A simple GUI (Graphical User Interface) allows for easy backup, restoration, and restore search operations. Full version is available as a demo version for free. Free trial version is available for download. Runs as a Service The software lets you run the backup program in the background. It is no longer necessary to run it manually. Once the program is installed, you can select the relevant action from the menu bar. In addition to local backups, you can also select to perform a backup of the current website or FTP server connection. FTP Server Backup You can also select the backup task from the software's menu bar. This way, you can back up your data to a remote FTP server. This feature is useful if you need to back up your server frequently. For example, if you have a server on which you store all your files, you may need to back up the server frequently. However, it is a cumbersome task to do this manually every time. Using iBackup, you can carry out the backup operation manually or automatically. Full Backup Another feature of iBackup is that it can provide a full backup of your data. This feature lets you carry out a backup of your entire system as if it were a freshly installed one. This function is used to back up your computer system, data, settings, applications, settings, and more. FTP Transfer You can also transfer the backup file to your computer, burn it to a CD, copy it to the removable media or even FTP. Security Another unique feature of iBackup is its secure FTP server. The software can be set up with a secure FTP server which has a password and an authentication code. This feature protects your data from unauthorized access. Automation iBackup can be set up to perform backups automatically. For example, you can let the software back up your system at night, when your computer is idle. Using this feature, the program runs in the background and takes care of your backup operations automatically. What's more, you can also start the backup operation after a certain time. For example, you can set up the program to back up your files and data at 3:00 1d6a3396d6
