## Snap DB Crack+ License Code & Keygen

Snap DB (Snap Database) is a small Windows application whose purpose is to help you create a database using simple editing features. It can be used for storing information about books, games, magazines, movies or other items from your collections. Portable program The portable running mode gives you the freedom to run the tool directly on your computer by skipping the installation process. Your Windows registry is not bloated with additional entries. You may copy the utility on any USB flash drive or other devices and carry it with you. User interface and importing/exporting options The tool adopts a clean and intuitive layout that makes use of a table for displaying the information. You can drag and drop files directly in the main window. Snap DB lets you import information from CSV or plain text file format, export data to AHK file format and rows to CSV files, as well as print the tables. Additionally, you are allowed to save the current project to a file so you can easily edit it in the future. Editing features You are given the possibility to append columns to the current table, add a new record in the table, insert the record above or below the selected row, edit or duplicate records, as well as delete the selected records. What's more, the tool lets you cut, copy or paste items, undo or redo your actions, copy cell and row data to the clipboard so you can easily transfer the information in another app, paste tab-delimited info, as well as run/execute cell data. You can also perform searches on the web for the selected cell via your default web browser, select all rows with a single command, find and replace items from the table, move the current selection up or down, and convert raw data to header names. Filters and configuration settings Snap DB allows you to filter out the information from the table by selecting the column, applying a condition (e.g. 'equals,' 'greater than,' 'less than,' 'contains') and entering a custom text. When it comes to configuration parameters, you can alter the text displayed in the table in terms of font, font style, size and color, keep a backup file after saving data, load last database on program startup, confirm or skip deletions, as well as pick the delimiter to use when importing data from CSV file format and delimiter string to use when copying data rows.
