Pressure-induced PZ-type transformations in Ge-doped hexagonal $\text{PbZr}_{1-x}\text{Ti}_x\text{O}_3$ films. High pressure-driven PZ-type phase transition is examined in $\text{PbZr}_{(1-x)}\text{Ti}_x\text{O}_3$ (PZT) thin films. Films with stoichiometry of PZT ($x=0$) are obtained by hydrothermal growth on a Si substrate. In order to tune the crystallographic structure of the as-grown films, the films are exposed to hydrothermal treatment under various temperatures and durations of time. The films with increased composition, i.e., $\text{PbZr}_{0.7}\text{Ti}_{0.3}\text{O}_3$ films, are obtained by prolonging the exposure time. The structural changes of PZT films under pressure were monitored by X-ray diffraction and high-resolution X-ray diffraction. The pressure-induced transition from tetragonal to orthorhombic was observed in $\text{PbZr}_{0.7}\text{Ti}_{0.3}\text{O}_3$ films for the first time, indicating the presence of a pressure-induced ferroelectric phase transition, with many fans during the time of its existence. The most memorable and infamous moment of that time was the removal of the "Fuck YEAH!" crowd surfing battle from New York's Ultra Music Festival, which created a controversy and was later declared an illegal removal. A collaboration with Major Lazer and French DJ Snake, "We Connect" featuring Justin Bieber, was released as the lead single from Bieber's fifth studio album Purpose. It peaked at number two in Austria, Belgium, Canada, Czech Republic, Denmark, Finland, France, Germany, Hungary, Ireland
