AutoCAD 2017 AutoCAD was originally created to enable the construction of buildings using CAD (computer-aided design) technology. The application was initially referred to as ACAD (AutoCAD Architectural). The CAD industry would eventually come to refer to the software as simply CAD. Its first major update was AutoCAD LT, released in 1989. AutoCAD was purchased by Autodesk in April 1994. The current version is AutoCAD 2017. AutoCAD is a well-known and popular commercial CAD application. It is the most widely used CAD tool in the world, based on the number of licenses sold. The first person to create a free-form drawing with an extension of the CAD idea, Paul Bourke, also co-founded Autodesk. In 2014, Autodesk's annual revenues reached \$2.4 billion, which is largely due to AutoCAD sales. History AutoCAD's history has three major phases: The Original AutoCAD (1982–1994) Acquisition by Autodesk (1994–2016) Microsoft acquires Autodesk (2016–present) The original AutoCAD (1982–1994) AutoCAD first appeared in 1981 as a desktop application. It was originally developed by Paul Bourke (an architect and graphics designer). In late 1982, it was first released to the public as AutoCAD. The initial version of AutoCAD was called ACAD (ACAD Architectural), an abbreviation for AutoCAD Architectural. Bourke stated the initial version was designed to be a highly visual "construction CAD" application, one with the user interface based on the method of creating constructions on paper. To this day, AutoCAD remains the best way to construct designs. In 1987, a feature named "construction" was added to AutoCAD, and it was made freely available to the public. The development of AutoCAD continued through 1989, and the company was acquired by Autodesk, a spin-off company from the now-defunct Sierra On-Line, in April 1994. AutoCAD LT (1989) In 1989, AutoCAD LT (AutoCAD LT Architectural) was released to the public. It was a complete re-write of the original AutoCAD, and was written in C++ and Tcl.
