What's New In JustStyle CSS Editor?

JustStyle CSS Editor is a tool that enables webmasters to easily manage and edit their cascade stylesheet files. JustStyle CSS Editor provides an interactive user interface and presents CSS properties in special wizards and generic value lists. JustStyle CSS Editor allows webmasters to choose specific style properties to edit (wizards), edit (value lists) or remove (keywords) CSS values from the cascading stylesheet of a single HTML document. JustStyle CSS Editor can be used with all HTML 4 and HTML 5 compatible browsers and supports CSS and XHTML. It supports Internet Explorer 7 and up, Firefox 2 and up, Google Chrome and Safari. It requires Java 7 or higher for the Java-Based Editor, Java 6 or higher for the JavaScript-Based Editor, and JavaScript for the JavaScript Editor. An update to JustStyle CSS Editor was released in November 2013 with some bugfixes and added many new features, among them the possibility to view source codes in the 'SmartView' mode. It also enables the ability to update the cascading stylesheet files in Internet Explorer 6 or 7 by inserting conditional comments, the ability to convert CSS properties to named values and to select any style property in a style tag by typing its name and hit Enter. The latest version of JustStyle CSS Editor is 2.2. Features Wizards The JustStyle CSS Editor provides several wizards to facilitate the edit of CSS properties. The list below shows the available wizards in the latest version: Generate CSS: This wizard allows webmasters to create cascading stylesheet files from the HTML code of a single HTML document. Create Cascade: This wizard allows webmasters to create cascading stylesheet files from the HTML code of several HTML documents. Create CSS From XML: This wizard allows webmasters to create cascading stylesheet files from the XML code of several HTML documents. Update CSS: This wizard allows webmasters to update their cascading stylesheet files in Internet Explorer 6 or 7. Update CSS In: This wizard allows webmasters to update their cascading stylesheet files in Internet Explorer 6 or 7 with an added option to specify if the change should be to the current version or a newer one. CSS Properties In List: This wizard allows webmasters to display the list of properties and their values in cascading stylesheet files. CSS Properties In Table: This wizard allows webmasters to display the list of properties and their values in cascading stylesheet files as a table. Calculate Dynamic CSS: This wizard allows webmasters to calculate the cascade list of CSS properties. View CSS: This wizard allows webmasters to display a list of CSS properties. Customize CSS (Customize CSS): This wizard allows webmasters to edit individual CSS properties. Wizards Generate CSS
