Q: How do I map vector from 3rd column to 1st column for each row in R? I have a table My task is to map the 1st column to the 3rd column and create a new one with a different name and add it to a dataframe. I have tried `data.frame()` and `data.frame(t(t(my_table)))` but none of them seems to work. A: Using your example: `my_table = data.frame(c(1,2,3), c("A","B","C"))` You need to transpose the data first: `my_table %>% as_data_frame() %>% pivot_wider(names_from = c("c"), values_from = c(1))` # A tibble: 3 x 2 A B 1 1 A 2 2 B 3 3 C Note that the order of the rows is not necessarily maintained. Consciousness has become the big new thing. Once, it was the

Looking back You live in a world that doesn't understand you and can't know you. It is hostile to you, it just wants you to fit into its plans. When someone gives you love, respect, a job, they do so because they want something from you. And that's why people who truly love you will make you a better person. Love is the ultimate teacher. Thinking about the past is a great way to make sense of life, but it can also be a way to torture yourself. It can be painful to feel like you were not who you thought you were. You may never feel completely right and that can be a hard thing to accept. It is not the past that is important, but what you do with it that's important. Don't live in it, live forward. You can't look back and say "I wish I had done X" because you can't change
