## What's New In Tuulimaa?

Tuulimaa is the best free tool to add and manage photo galleries online on your website without programming a single line of html code. The software is free to use and totally ad-supported, which means no hidden surprises. In fact, we don't even require that you register, but it's recommended to. The reason is that it's not very convenient to edit your private gallery without registering a new account.

- Data storage and backup: Tuulimaa creates all data to an online MySQL database. The data is not stored locally on your computer or cloud provider, so no one will be able to access your private data.
- Supported browsers: Mac and Windows.
- Minimum ram size: 256MB and 1GB of RAM are required.
- Supports high resolution images up to 25 M or more
- Support for RRS subscription
- It uses Google doc and Amazon s3 as sources.
- It is cross browser compatible and windows based.
- It is very fast and allows hundreds of thousands of photos to be added without slowing down your computer.
- Charts and pagination.
- Website generation.
- Custom results output.
- Thumbnails and search engine friendly URL's.
- Categorization.
- Easy to add comments and notes to each album.
- Fully customizable skins.
- The program comes with 10 skins.
- 21 different skins are available for free download.

Features:

- Slideshows: Image showing on a slide.
- Thumb: A reduced version of an image, useful to reduce the weight of web pages and to upload images on forums.
- Albums: The software allows the creation of multiple folders, which can be named and organized as you wish. A folder stores all photos contained in the folder: photos can be directly added to a folder in one click. To create a new folder or change existing folder, click on the folder and choose from the menu.
- Albums: You can also organize your photos into albums.
- Page description: A separate page with detailed information about your photos.
- Search engine

---

friendly url's: When you create your web site, some pages will be more important than others, so it is useful to have a good url for them. The url generated by Tuulimaa for every photo will be automatically converted into a sitemap for search engines. If you chose tuulimaa to generate your website, then it will be automatically indexed by Google,

---
