The keywords.txt and letters.txt are two independent files (each one is in a separate line). First letter in a word In this project, the first letter of the alphabet will be defined as the first letter of a word. This letter is shown in the applications menu. The list of the first letters is generated in the following way: If the dictionary is open: the first letter of a word is the first letter of a word of the dictionary. If the dictionary is closed: the first letter of a word is the first letter of the previous dictionary. In the case of words starting with a blank space, the first letter is automatically the first letter of the word, except for words containing hyphens (the word "this-is-hyphenated" will display this is hyphenated).
