**Branding.zip Igo Primo 2.41**

I have to make a new array to store the  
latitude and longitude in, but don't know

---

how. A: Without the structure of this code I don't think you will be able to do that. Here is one solution. I'm not sure if it is the best solution but it shows you how it is done.

```
connect_error) {  
    die("Connection failed: ".  
$db->connect_error); } $sql = "SELECT  
* FROM somewhere WHERE  
gps_latitude >= '$latitude' AND  
gps_longitude >= '$longitude' AND  
gps_latitude query($sql); // if there is  
more then 1 row if ($rs->num_rows) {  
$result = array_shift($rs->fetch_assoc());
```

---

```
array_push($users, $result); // End if }
else { // If there is only 1 row then show
it $result = $rs->fetch_assoc(); } // close
the database connection $db->close();
//Now you can iterate over the array and
show the results in your web page.
foreach($users as $user) { echo 'Lat: '.
    $user['gps_latitude'].'Lon: '.
    $user['gps_longitude']; } ?> Q: Is there
3e33713323
```
