You would have thought it obvious that this is a very serious crime in the Victorian age, that we had serious crime in the modern age. Then again, in a great deal of our fiction, we have also taken for granted that many things that are considered to be criminal are not crimes. Now, of course, we are not saying that James Bond is a man without scruples, but there is something more to this than simply a series of adventures for a smart, hardened ex-agent, and it's got to do with the world that he has had to make his own since he left the Service, since the events of the previous books, since he became a freelance agent, since he became a gentleman. It's a world that is much more complicated than that of the fictional world he has so frequently inhabited, and one that is heavily influenced by the history and the philosophy of crime, as it appears in his own time. So we have a gentleman, not a gambler, as he is supposed to be in the present. And his antecedents are a little different from that of James Bond. For one thing, he has no money. In fact, he has absolutely none to start with. He hasn't had any for some time, since the war. And he's been in the diplomatic service, you may remember, and his job is that he's second secretary to the embassy in Vienna.
