Firstly, what is a proxy? A proxy is a server, or a network node, that relays a communication between a client and a resource on the internet, without the resource being identified. It's like a middleman that connects and relays the exchange of data between two distinct nodes. A proxy is usually built to protect

the user's data, so that you don't have to worry about any possible leakage of your personal information. FTP proxy on Kodi When you're connected to a network like a college or a friend's house, you can also use FTP proxy to bypass any restriction and to save a lot of time while you do your work on the internet. The internet is not always easy to access, especially when you're in a country that has strict laws. Or maybe you're

at home and want to watch your favorite streaming website on Kodi. With FTP proxy you'll be able to access your desired website as soon as you come home. Using FTP proxy is as easy as using the proxy settings on your Kodi application. In this way, you can be sure to have full control over your data. And, what's best, you can use this proxy even if you're in a country with strict laws. Why choose a proxy VPN sets up a

virtual network to protect your data, and VPN proxies work in a similar way. It's like a virtual network created within your internet, where you can access the internet without being tracked by the security agencies or the ISP. All in all, proxies are created with the following purposes: Data bypassing – to protect your data from security agencies or ISPs Data filtering – to protect your data from unauthorized access DNS

bypassing – to bypass blocked websites
Speed increase – to access the internet on a slower bandwidth
There are many types of proxies that are used today, including proxy, ftp proxy, socket proxy, Web proxy, etc., but all of them work in a similar way. FTP proxy uses FTP protocol to help access the internet. It uses a single port which is 3128 by default. To use FTP proxy you'll need to update your Kodi application first, and

then open the Kodi application
