

[Download](#)

February 13, 2019 - If you use torrent download, you first need to download uTorrent. When the Lego City Undercover download is complete, extract the . exe (downloaded file) and open it. Once launched, you will see the Start menu where you can select the Install option to install the software. This is the default installer, so you will immediately see the target version selection window. Select "Full install to install everything" to install all the software you want. When it's done, you'll see a window where you'll have to select the folder where you want to install the software.
