PC Performer Free Download

PC Performer Cracked Accounts is a software program designed to scan, clean and fix problems in the Windows Registry. The app has a simple interface and an intuitive layout that should be easy to figure out. As soon as the program is installed, it performs a full scan of the Registry and lets you know the exact state of the computer. Furthermore, it can tell you where the problem is coming from, dividing all the located errors into categories. For instance, it tells you how many of the errors it found are related to the system, the user or to third party apps. Also, the software provides an overall assessment of the PC, letting you know how affected its performance is by the registry problems. Cleaning the faulty registry entries only takes a few seconds, but the process depends on the number of located errors. Also, before performing a new scan, you can fiddle with the settings, letting the app know where to look for errors. For instance, it can search the fonts, help files, history lists, shared files, shortcuts, file types and startup programs, just to name a few. PC Performer Crack For Windows lets you set up an exclusion list with all the registry keys you want to ignore in the scanning process. Furthermore, PC Performer Cracked Version can defrag the Registry or create a backup. A scanning schedule may be set up, including a recurrence pattern. Thus, you can have the app search for errors on a certain day, on a daily or weekly basis. Overall, PC Performer Activation Code is a useful program that is easy to work with. Inexperienced users should have no problems in figuring out all the functions provided by this software.... PC Performer Crack Product Key

PC Performer is an easy-to-use registry cleaner designed for both Windows Vista and Windows XP. Clean a single registry entry, clean the whole registry, or view the registry in detailed mode. PC Performer is a software tool to scan your system for problems with the Windows registry. The software scans the registry in more than three ways: by category, type, and entry. The entry is divided into its sub-entries, like files, services, drivers, and user. Each entry shows its full path and the amount of errors in its history list. Clean individual registry entries, the whole registry, or view the registry in detailed mode. PC Performer provides a batch file to clean all the errors with one click of a button. Customize the error report with the user information in which it appears. Change your own settings and schedule when to check the registry. Support: PC Performer can scan the registry for errors, look for individual registry entries, or view the entire registry. It can clean all the found registry errors, such as deleting, moving, or adding registry keys. Run the registry scan at specified times, such as daily, weekly, or monthly. PC Performer is designed to be compatible with all versions of Windows Vista and Windows XP. System requirements: PC Performer is a Windows program that is not dependent on any operating system, hardware or other software. Revision History We periodically update our software to ensure it remains compatible with all our features and compatibility problems.
