Screenshots: Mac OS X: Windows: License: PyCalendarGen is released under the GNU General Public License v2.0. ``` [The effect of endogenous adrenal steroids on the somatotropic activity of the adenohypophysis]. The blood corticosterone level in the adenohypophysis of albino rats after restraint stress increases 2.7-fold. This is accompanied by a two-fold increase in the blood somatotropic activity of the adenohypophysis. The action of corticosterone is brought about in two ways: 1) on the receptor level of the adenohypophysis; 2) on the intracellular level, i.e. on the site of transformation of the adrenal corticosterone to the effector peptide.KARACHI: The Independent Newspapers Limited (INL) would be shut down if a federal investigation proved that it was collecting information for any government agency, the editor-in-chief of the group said on Friday. Speaking at a conference, editor-in-chief Shaukat Siddiqui said: "Of course we are gathering information, but it is absolutely legal. So we do not know where
