RSVG for Delphi & C ++ Builder Rio Category:Barcodes Category:Barcodes of the United States Category:Barcodes of the United KingdomTusculum Academy Tusculum Academy is a private, classical, preparatory and college-preparatory school located in Tujunga, Los Angeles, California. Tusculum is affiliated with the Roman Catholic Church and is run by the Society of Mary. Background It was founded in 1911 by Marie Marguerite Marmion as a Roman Catholic, co-educational academy for children studying pre-college preparatory work. It has gone through several name changes and expansions, with various partners and board memberships. In 2015, the school is celebrating their 100th anniversary of operation. Institutional missions include supporting the faith-based tradition, fostering academic excellence, preparing young people for college, fostering leadership, and preparing students for vocations. As of 2018, the school had 145 faculty members and a student body of approximately 425 students, ages 4 to 18. History Tusculum Academy was founded in 1911 by Marie Marguerite Marmion, known as "Mother Marie", as a Roman

Delphi component manager components for Delphi XE-3, Delphi XE-4, Delphi XE-5, Delphi XE-6, Delphi XE-7, Delphi XE-8, Delphi XE-9 and Delphi XE-10. PSOFT Barcode Studio Professional For Delphi XE-3 SX-BarcodeSource Scalable Barcode Studio Category:Barcodes Category:Pascal softwareQ: Save svg to blob I am trying to create an image that can then be saved to the server. This is the code i have: var canvas = document.getElementById("myCanvas"); var context = canvas.getContext("2d"); var mySVG = document.getElementById("svg"); context.fillStyle = "black"; context.fillRect(0,0,canvas.width,canvas.height); context.save(); context.translate(20,20); context.globalCompositeOperation = "destination-over"; context.fillStyle = "#31C4FF"; context.fillRect(0,0,canvas.width,canvas.height); context.restore(); var dataURL = canvas.toDataURL("image/png"); window.saveAs(new Blob([dataURL], {type: "image/png"}), "Test.png"); This code saves a blank png file. I have seen various examples of this question but I can't seem to get it working in my code. A: The problem is that canvas.width and canvas.height are defined before the context is created, so their values are 0. Therefore, context.save(); context.translate(20,20); context.globalCompositeOperation = "destination-over"; context.fillStyle = "#31C4FF"; context.fillRect(0,0,canvas.width,canvas.height); context.restore(); should instead be: context.save(); context.translate(20,20); context.globalCompositeOperation = "destination-over"; context.fillStyle = "#31C4FF"; context 0298e982ba
