I have a JavaFX application that reads data from multiple files, when I run my application from Eclipse I get the following error in the output window: Exception in thread "main" java.io.FileNotFoundException: /home/tim/workspace/MainApp/test.txt (You have reached the maximum number of permitted opened files) I believe that there is a setting in Eclipse to set the maximum number of files that a program can have open, I cannot figure out how to access this in my Eclipse setup. I have Googled everywhere and tried turning off all Eclipse settings like maximum opened files and Garbage collection. The error still exists. Has anyone else encountered this and solved it? A: Just delete your eclipse workspace and start it again. That will be a fresh configuration with no corrupted preferences.
