Q: Trouble using concat with react-sortable-tree I have a component with a component nested within it and I am trying to get the Tree to reorder items that I move with a drop using the following code. However, I am getting the error: TypeError: Cannot read property 'previousValue' of null When using the code from the documentation. `render() { let changeHandler = (obj) => { this.setState(prevState => { // send the updated object to the children array if (prevState.children.indexOf(obj.id) === -1) { prevState.children.push(obj.id); } return { children: prevState.children }; }); }; let canMoveItem = this.state.isDisabled || !this.props.canMove; return ; } A: found it, i was using state.children instead of state.children.id render() { let changeHandler = (obj) => {`

DESCRIPTION Overview of the Windows 7 Desktop: The Start button and its associated menu have been replaced by a new Windows 7 tile interface. The user can easily find the programs that he/she uses most often by organizing their tile layout into a custom Start screen. **How to: Creating a Custom Start Screen:** Creating a Custom Start Screen: To quickly switch between different programs or web sites, use the Windows 7 tile interface. It is possible to create your own custom layout of tiles on the start screen, so that you can quickly access your most frequently used programs or web sites. For example, the icons of your favorite programs, such as Internet Explorer or your e-mail client, can be replaced by tiles, which you can quickly access by scrolling over them with your mouse. **How to: Customize the Start Screen:** 1. Open the Start screen from the Desktop. 2. Right-click a blank area on the Start screen and select Customize from the popup menu. 3. If you want to add or remove tiles, select Add to display the tiles. 4. If you want to replace an icon, select an existing icon and click Change. 5. Drag an icon to the blank area and release the mouse to add it to the screen. 6. To remove an icon from the Start screen, drag it to the Recycle Bin. **The new Windows 7 Taskbar:** The newly-designed Windows 7 Taskbar provides quick access to all running programs, folders, or documents. In addition, the Taskbar displays the time, battery life, and wireless connectivity in the Taskbar Notifications area. **How to: Customize the Taskbar:** 1. Open the Taskbar. 2. Right-click the Taskbar and select Properties from the popup menu. 3. Select Show Windows Notification Icons from the Taskbar Options dialog box to display the icons of the running programs. 4. To remove a program icon from the Taskbar, drag it to the Recycle Bin. **How to: Creating Shortcuts for a Long Folder Path:** For example, if you frequently access the Documents folder (such as C:\Documents and Settings\Public\Documents), you can add the folder shortcut to the Taskbar and store the complete folder path. **How to: Creating Shortcuts for a Long Folder Path:** 1. Open the Start screen. 2. Click the down arrow on the right side of the search box and select the down arrow again. 3. Select Shortcuts. 4. Click the Add Shortcut link. 5. Enter the folder path and file name of the shortcut. 6. Right-click the shortcut in the list, and select Properties from the popup menu. 7. If you want to use the
