The game uses 3D engines such as Unreal Engine 2 and Unreal 3D Engine. According to the plot, the game is dedicated to Joseon (a kingdom that existed in Korea in the 17th century), as a time when the army consisted of archers, and during this time, teams of players from several people had to not only repel enemy attacks, but also perform various tasks (first turn, shoot accurately from a bow), which forced the players to work as a team. 1. Pumpkinhead zombies that can be destroyed. By shooting at the team in turn, you can kill all the zombies, protecting your team, and also spend points. 2. A very high level of difficulty, in which it is impossible to open the door, and doors can only be opened outside the labyrinth. If someone even scratches the door, things get even more complicated. 4. The ability to escape from the labyrinth - by clicking on the gear on the right, we get into much more complex and lengthy corridors, while, of course, you can break the door, but this can lead to the death of the team.
