Quickly create detailed menus using minimal keystrokes. Quickly create detailed menus using minimal keystrokes. Keyboard Shortcut: Manual: Ctrl-J [To create a title entry for the main menu, simply click the Make Title button. This will open a new dialog where you can enter the title information, as shown here. Once you are done entering the title information, simply click OK to save the title. For the video duration, just type the length in seconds into the dialog. The default value is 30 seconds. Next, move the slider next to Video Duration to the left to make sure the length of the video is only shown for that duration. If you want to see the duration in hours, minutes and seconds, click the options button (shown in the upper left corner) and select Time format. You can then choose the way the time is displayed. The default value is set to "mm:ss". Once you are done entering the options, click OK to save the information. You can now close the title information dialog. To create an entry for the sub menu, click the Make sub title button and follow the same steps, only that you don't need to enter the video length. [Instead, just type the name of the sub-title in the text box and

click OK to save the information. To delete a title or a sub title, simply click the trash can icon in the top right corner of the dialog. [Click OK to save the changes. In addition, when you create the subtitles, there is a cool feature that allows you to import an embedded text file. This means that you can use the DVD comment text file that is contained in the same folder as the video file and add it to the subtitles. Click the Options button in the toolbar and select Subtitle. Then, click the Import button. A dialog will open up where you can select the text file. Once you are done, click OK to save the information. You can now close the dialog. The output of your video can now be viewed with the included AVCHD Converter Player. You can also choose from a collection of more than 400 image, music and audio settings. Make sure you try it out for yourself. Video settings: You can configure the video quality and choose from a range of settings, such as frame rate, frame width, frame height and video and 1d6a3396d6
