Image caption Maths and science graduates may enjoy higher earnings than "soft subjects"

Maths and science graduates are set to enjoy greater earnings than graduates with a degree in arts subjects from 2020, the government has suggested. Instead of an average £26,000 a year for graduates of arts subjects, those studying maths and science will earn almost £30,000. It will compare graduates' earnings by subject rather than schools or universities. But the head of the CBI said it would "make a major contribution to rising inequality". The government's new income statistics will also show that graduates pay less in income tax than those without a degree. But, by 2020, the proportion of the income from tax raised by graduates will be much lower than it was in 2013 - down from 3.7% to 3.1%. 'Differentiated, not differential' Chancellor of the Exchequer George Osborne said the starting salary would come with a rising salary until 2020. Chancellor of the Exchequer George Osborne said: "With the right skills and qualifications, our young people can seize this opportunity to go to university and get the high-wage, high-skill jobs of the

---

future." He added the move would make higher education "differentiated, not differential". As in the past, there will be no differentiation based on school or
