YeahReader is a fast and easy RSS, RDF, and podcast reader. You can read RSS feeds, podcasts, and syndicated web content with a single, easy-to-use interface. You can easily check feeds from any Windows Explorer or start menu favorites like Google Reader, Yahoo, and others using built-in Feeds module. With built-in OPML import/export support, you can easily transfer all your feeds to and from a number of other applications. YeahReader currently supports fetching and processing RSS, RDF and podcast feeds, it uses the same protocol used by Google, Yahoo, MSN, Slashdot, etc. When updating RSS feeds, the program will check whether the changed content is available in the feed server. If the content is available, it will update the corresponding data on the user computer. System Requirements: Minimum Requirements: .NET Framework 4.0 CPU: 2.4 Ghz or faster RAM: 512 MB Hard Disk: 10 Mb ActiveX, Java, JNI, etc. Macromedia Flash, HTML5 Multilanguage Any Windows XP/Vista/7/8/10 Any Mac OS X 10.2 or later The size of the RSS feed file limit: no limit Developer note: Download a free trial version of YeahReader to test the application. You need to download the YeahReader.exe installer file after the download process is finished. After the download, launch the installer file and select the language and then choose the product. You can then press the Next button to create an account. Now you can double-click on the YesRSS.exe icon to run the application. If you are using an older version of the installer, you need to download it again. You can also use the offline installer. After installing the application, make sure that you are connected to the internet for automatic updates. MondoReader is a free program that lets you read RSS feeds, RDF feeds, and podcasts. MondoReader offers a clean and easy-to-use user interface for readers, a full calendar with a history of the last modified dates for each feed, a file viewer with columns that support tag or keyword sorting, a text-to-speech converter, and a list of the most recently added feeds. YeahReader is a free RSS, RDF and Atom feed reader with support of.opml, HTML and RSS2 Atom feeds. It has built-in proxy support, blog client, RSS news format converter, download manager and RSS feeder. This program lets you subscribe to an RSS feed and get real time updates every time new content is posted. No, the plugin doesn't work, or it's malfunctioning. Please use the advanced search settings and find the exact bug. Is there any reason why you think this is "the one for me"? If you find yourself wishing it was more feature complete, then you may be asking the wrong question, for which I can only suggest you get yourself a better newsreader. Anyway, I like No. 1. Extremely fast loading, even when the feed is really huge. 2. Does not hang when there is too much incoming. 3. Intuitive and clean user interface. 4. Built in support for the subscription dialog for livejournal. 5. Super fast download support for OPML and the ability to read headlines only. Not having to go to the browser every time to reload a feed is the big plus for me. Other readers often force me to reload the whole feed to get the latest headlines. Maybe add support for more blogs? I'd also love to see it work for freshmeat and phparchives. Version 1.5 I completely reworked the system tray icon. The icon is now completely transparent with a custom image showing the number of feeds that are currently loaded. It also shows the icon for the selected feed, if any. Version 1.4 It's now possible to subscribe to feeds directly from the main interface. Choose the "Subscribe..." button on the sidebar, and the dialog that opens will allow you to subscribe to an arbitrary number of feeds. It can also be used to remove subscriptions. It now works for RDF feeds as well, not just RSS ones. You can also now change the skin and font of the dialog. Version 1.3 The update dialog now remembers its position when reopened. The update check now supports HTTP 1.1, which means you can finally update while using non-standard server configurations (mod_proxy_balancer, for example). Version 1.2 Support for LiveJournal. The update check can now report new content without re

YeahReader is a simple and powerful RSS (or podcast) reader. Features: * Use RSS, RDF, and Atom formats (with podcast support for RSS) * Support for Subscriptions, Comments and Ratings * Support for RSS, RDF and Atom (with podcast support for RSS) * Support for Linux, Windows and Mac * Support for proxy and transparent page load * Support for pop-up updates * User-friendly user interface * Full screen * Default font size * Sync with LiveJournal * Export to HTML, CSV and JavaScript * Copy to clipboard and printer * Bookmark support News and podcasts (via RSS and Atom) may be grouped into various collections, called 'channels'. There are six available collections: Business, Culture, Entertainment, Health, News and Science. The current collection is the News collection. Each collection is represented by a folder in the main window. You can switch between collections in the main window by pressing the 'G' key or the 'Control' and 'G' keys. You can switch between folders in a collection by pressing the 'F' key. When the program is running you may simply press the 'F' key or use the 'Go to folder' menu to open the folder you want. Each entry in the collection has a 'folder link', a 'title' and a 'description' that contains a link to the original news source. The description has two fields: 'url' and 'timestamp'. New items are added to the collection by pressing the 'Add item' button in the main window. Each item is assigned to a category. This can be changed by selecting a category and pressing the 'Modify item' button in the main window. You can assign a news item to several categories. In the main window you can use the 'Bookmark' button to assign a news item to your favorites. The bookmarks are remembered in the collection settings. You may also choose to save news items in a 'Reading list'. You may find it more convenient to save all the RSS feeds you subscribe to in the main window instead of opening them in each separate window. To do this, select an entry in the main window and press the 'Save RSS...' button. You may change the font size and select the font type by clicking the 'Font settings' button in the main window. In the main window you can change the window theme by selecting the theme you want and pressing the 'Apply' button. Yes, you may create or edit the folders in the collection. To do this select the desired folder and press the 'Create folder
