Mirra Crack 2022 [New]

Mirra is a hard disk-based, modular, software RAID (SRAID) capable, high-capacity personal server for home, office, and small-to-medium business environments. With Mirra you can quickly and easily create a RAID system and connect to it from the PC's floppy or IDE drives or from other PCs through a network. The Mirra software is an all-in-one solution with an intuitive user interface, and includes graphical interfaces for users to design any RAID configuration and assign one or more hard drives to protect the data. A dedicated, powerful processor (96-core AMD Opteron 8100 Series) manages the RAID controller and the CPUs. Mirra is the first SRAID-capable RAID controller to support 512 MB/s-class SRAID configurations. Mirra is designed for high-capacity configurations with throughput of up to 520 MB/s per disk. Mirra has a maximum capacity of 1.5 TB with up to 4 500GB hard drives. It supports the maximum size of 12.3 GB (4 sectors) and 4 independent 120GB hard drives. Mirra is easy to install and configuration steps and no special tools needed. Using Mirra, you can create a RAID 5 or RAID 6 configuration from any combination of hard disks in the RAID controller. Another key feature of Mirra is its ability to protect data, applications, and operating systems on up to six hard disks. You can protect and synchronize the contents of any hard disks in the storage array. Mirra maintains a complete and secure backup of all data on the array. Mirra has a secondary backup function called Remote Mirroring. Mirra offers a remote network access and remote synchronization to ensure data is only available to the right users. Mirra offers a variety of synchronization options, allowing you to create a remote backup or synchronization server. The 6a5afdab4c

Mirra Product Key
