You can choose the output folder to save the converted files and you can specify whether the PDF file should be in A4 or Letter format. Screenshots: Main window: This invention relates to an optical system of a digital copying apparatus. A digital copying apparatus employs an electrophotographic technique

which is far superior in terms of image quality to a conventional analog copying technique. Such a digital copying apparatus has a sensor for sensing light reflected by an original document and converting the optical image into an electrical signal. Such a digital copying apparatus converts the thus-converted electrical signal into a digital signal and the digital signal is then modulated in accordance with the gradation value of the image of the original document. The digital signal is converted into

a latent electrostatic image on a photosensitive member. The thus-formed latent electrostatic image is then developed to form a toner image on the photosensitive member. The toner image is transferred onto a paper sheet and fixed thereon. The image sensor includes a solid-state imaging device such as a charge-coupled device (CCD). In general, the C
