## AutoCAD

In November 2006 Autodesk introduced AutoCAD LT, a free, simplified version of AutoCAD that was later renamed to AutoCAD Architecture 2010. AutoCAD LT has since been replaced by AutoCAD Architecture 2012. AutoCAD LT is a single-user version of AutoCAD that runs in the Windows operating system, with capabilities to export DWG files and handle external programs. AutoCAD LT can handle simple 3D models that can be rotated and viewed from any angle. It also has basic 2D drafting functions like text and line editing, a feature-limited 2D-to-3D conversion, and an export function to DWG and DXF files. Autodesk AutoCAD LT does not support some

---

features found in AutoCAD, such as the ability to handle higher-resolution and better-quality drawings. AutoCAD LT is one of several competing commercial CAD systems that are available free of charge.

**Key Features**

**File formats:** AutoCAD LT has a set of proprietary and standard file formats, such as DWG, DXF, and PDF.

**File format import/export:** AutoCAD LT can import DWG, DXF, and PDF files into and export them from AutoCAD.

**Dependency on host operating system:** AutoCAD LT supports Windows-only and depends on the Windows OS to run. AutoCAD LT also supports some Unix-based host operating systems like Linux and Solaris.

**Dependency on host processor:** AutoCAD LT runs on any Windows-compatible computer.

AutoCAD LT also runs on some Unix-based

---

systems like Linux and Solaris. Access to most of the AutoCAD functions: AutoCAD LT uses most of the same commands and toolbars as AutoCAD. Extensibility: AutoCAD LT uses the same programming languages and API (Application Program Interface) as AutoCAD. User support: AutoCAD LT has a built-in Help system for use when the user is new to AutoCAD. AutoCAD LT also has a Support Center that features a knowledge base and AutoCAD community forums. AutoCAD LT System Requirements Autodesk AutoCAD LT supports all Windows operating systems from Windows 95 to Windows 8. Microsoft Windows 7 SP1, Windows Vista SP2, Windows XP SP3, Windows 2000 SP4, and

---

The user can use functions and commands in AutoCAD R14 to access the standard functions or commands and customize them in a LISP (Common Lisp) script. AutoCAD has a built-in application framework, which has been designed with extensibility in mind. For example, this framework supports classes, objects, inheritance and polymorphism, and most of its classes are single instance only. AutoCAD has a command-line (CLI) application which accepts LISP (Common Lisp) scripts. It is similar to the text-mode AutoCAD itself, and is a command-line interpreter which has the ability to access AutoCAD API functions from a script. AutoCAD's command-line application has been tested with LISP scripts only, and is incompatible

---

with other languages. AutoCAD also supports graphical command-line interfaces using its own command-line application, and there is an API for developers to build their own. AutoCAD also supports a DLL (Dynamic Link Library) AutoCAD XLL (Extension Load Library) that can be built with a third-party compiler. The available add-ons, utilities, and plugins can be divided into two categories: Autodesk Exchange and 3rd-party. The Exchange, or Extensible Application Markup Language, format is similar to XML and includes several XML-based schema definitions to describe the format of add-ons. The 3rd-party category includes add-ons that are not Exchange-formatted and whose developers cannot guarantee the formatting and quality of their products. ObjectARX supports the creation

---

of extensions written in the C++ programming language. ObjectARX programming is similar to VBA but is closer to AutoLISP. Sheila Malveaux Sheila Malveaux is a professional wrestler. She currently works as a manager and valet for WWE, where she has competed in various championships, most notably in the Divas Championship as the manager of the former Divas Champion Charlotte, and most recently as the valet of the former Intercontinental Champion The Miz. Professional wrestling career World Wrestling Entertainment/WWE Divas Champion Charlotte After debuting on the March 25, 2006 episode of SmackDown!, she began managing rival Victoria.

2006. A couple months later, Victoria revealed to the media that she and her boyfriend Daniel Bryan had gotten married in June. In May 2008, WWE announced that Cathy Kelley had been made the manager of Victoria, replacing Malveaux. After about a month, Malveaux returned to help the new Divas Champion Melina after she took a beating from Chavo Guerrero and Billy Kidman. A couple months later, the Divas Champion Maryse was scheduled to get married, but she ultimately got cold feet and canceled the wedding, and that was the last time Malveaux managed any of the Divas. During the summer of 2009, WWE announced the return of Christy Hemme as the new manager of the Divas Champion Kelly Kelly, replacing Malveaux. Backstage and managerial roles In the fall of 2010,

Malveaux joined the backstage staff of SmackDown, where she worked as a valet for The Miz, who was then a mid-carder, often arguing with his then-girlfriend Maryse. During this time, she would often be the one to give him good advice, help him with his problems, and occasionally get into big physical altercations with him on the show. In the summer of 2011, Malveaux was briefly a valet for John Cena on the Raw brand, but was fired in the middle of the show. Shortly after Malveaux's stint as a valet, Malveaux was granted an opportunity on SmackDown as a backstage manager. On October 19, 2011, WWE unveiled Malveaux's role in this new, permanent role. On October 24, Malveaux became the valet of the newly drafted Tyson Kidd, who had been fired from WWE following a

What's New In AutoCAD?

"You can't do design reviews the way they used to be done. This is the next step forward in designing using the same technology used to design AutoCAD," said Dieter Zoller, Senior Director of Software Engineering for the Autodesk Design Technology group.
