History AutoCAD was originally developed and marketed by Dia Corporation of Vancouver, British Columbia, Canada, a company with a history in the CAD industry dating back to 1973. In 1982, Autodesk bought Dia and began to release AutoCAD in 1983. AutoCAD was originally a hardware graphics controller-based system, but evolved into a software application, starting with release 2.0 and ending with AutoCAD 2014. AutoCAD runs on Windows and macOS. As of 2019, there are also versions available for iOS, Android, and a range of Linux distributions. According to press reports, the vast majority of business in the United States involves the creation and use of 2D CAD drawings and specifications, with US\$9 billion spent in 2015 on AutoCAD and related software in the US alone. AutoCAD is the market leader in the US, where it is estimated to represent 80% of the CAD market. Releases AutoCAD has been released in one major version since its initial release. All subsequent releases have been upgrades to the previous release, with the release of AutoCAD 2010 representing a complete rewrite of AutoCAD 2009. From release 3.1 on, the development team has referred to subsequent releases as "versions" or "releases", although AutoCAD 2019 (16.1) is not a major upgrade from AutoCAD 2018 (15.4). Releases

since 2010 are numbered, such as AutoCAD 2011, which has a version number of 1.0, and AutoCAD 2017, which has a version number of 15.1. AutoCAD 2004 is a minor upgrade to AutoCAD 2003, which is itself a major upgrade to AutoCAD 2002. AutoCAD 2005 is a major upgrade to AutoCAD 2004, and AutoCAD 2009 is a major upgrade to AutoCAD 2008. AutoCAD 2010 was a complete rewrite of AutoCAD 2009, and AutoCAD 2011 was a major rewrite of AutoCAD 2010. The rewrite of AutoCAD 2012 included the end of support for AutoCAD 2000, AutoCAD XP, and AutoCAD MEP, and was a complete rewrite of AutoCAD 2011. Revenue for AutoCAD and AutoCAD LT has remained relatively stable over the last decade, although the subscription revenue model has led to a growing proportion of revenue coming from Autodesk's cloud services.
