### What's New in the?

Eastsea Html to Image Converter is a flexible and easy-to-use tool that converts any html page (URL) to image. It captures the whole web page's content into JPG, BMP or GIF on the fly. It has an user friendly interface that supports drag & drop. You can convert many pages in batches. Eastsea Html to Image Converter makes batch file conversion simple. Create a batch list of many html pages and convert them all to a single selected image format. The converted files will be saved to a pre-selected directory folder and the original files will remain untouched. How to use: After installing, open its run as administrator, type the URL of your html page, and click "HTML To Image" button. It will automatically capture the whole web page's content into JPG or BMP or GIF. You can preview the conversion result and capture the image to another folder (with the original HTML page). When you are done, you can click "Convert to All" to convert them into BMP or JPG or GIF in batch. Frequently Asked Questions: Q: How can I convert the html page to image? A: To start converting, first select the html page that you want to convert. Q: How can I choose the output format? A: To start converting, first select the html page that you want to convert. Q: How can I choose the image quality? A: To start converting, first select the html page that you want to convert. Q: How can I customize the output folder? A: You can select the output folder in the main interface, or you can create it in the run as administrator dialog. Evaluation of the efficacy of nonsurgical periodontal treatment by two methods. Fifty-six patients presenting with moderate to advanced periodontal disease participated in a split-mouth clinical trial to compare the relative efficacy of nonsurgical treatment of the periodontal lesion with 1) a metallic curette and a conventional surgical procedure, or 2) a curette and ultrasonic scaling with water. The periodontal index was assessed at baseline, at the completion of the nonsurgical phase, and 4 months after surgery. Both the overall level of disease

---

and pocket depth decreased from baseline to 4 months after surgery. There was no significant difference between the two treatment modalities. Nonsurgical treatment with a metallic curette was as effective in treating periodontal disease as surgery plus ultrasonic scaling.

1. Field of the Invention The present invention relates to an image pickup apparatus and a lens control method.
2. Description of the Related Art In recent years, solid-state image pickup apparatuses have advanced miniaturization and high functions and, along with the advancement of miniaturization, the number of pixels has been increased year by year. Thus, there is
