What's New in the Portable Neo 039;s SafeKeys?

Portable Neo's SafeKeys is a lightweight software application built specifically for helping you protect your passwords or personal information and block phishing, identity theft, and hacking attempts. The tool employs anti-keylogging techniques in order to keep your passwords and information secure and private. The advantages of being portable Since this is the portable version of the program, it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to protect your private information from keyloggers on the breeze, without having to go through installation steps. Intuitive layout You are welcomed by a clean feature lineup where most of the operations can be carried out with minimal effort. It offers support for a built-in keyboard for helping you protect your data against unauthorized viewing and lets you transfer data to the desired location using several modes. Encryption operations Portable Neo's SafeKeys gives you the possibility to use the mouse mode for inputting data or "Injection" mode, which is particularly useful for programs that don't allow "drag and drop" operations. What's more, there are several configurable parameters for helping you tailor the keyboard layout, block clipboard operations, disable the Print Screen button, hide your sensitive data behind asterisks, as well as set the transparency for the primary panel so other users are not able to notice it. Other notable characteristics worth mentioning are represented by the possibility to automatically hide the tool after dragging and dropping the passwords in the required fields and specify the time that you need to hover over a key. Bottom line To sum things up, Portable Neo's SafeKeys offers a simple yet efficient software solution for making sure your data remains private from unauthorized viewing. Thanks to its intuitive layout, it is suitable for rookies and professionals alike.
