What's New In?

Air Video Server is a cross-platform video streaming

server application that allows you to stream media files directly from your PC over the Internet to your iPhone, iPad or iPod touch. In the first step, the app allows you to set up a video collection on your PC. Afterward, you can launch the Air Video Server on your iPhone or iPad. The application doesn't require any prior setup, as the

Bonjour service will automatically discover the server and start streaming the media files directly to your handheld device. Note: Apple devices that support Bonjour don't support DRM-protected videos or certain encoding techniques. The app is not able to play back videos from your iTunes Library. Description: The main characteristic of the

Macbook is the integrated high-quality AirPort Extreme wireless network adaptor. You can also use it as a small, compact router. Its wireless performance and durability are unsurpassed. It is also a great value: the price does not include the purchase of an external network adaptor. In this guide, you will learn how to set up your Macbook Air

with wireless access to the Internet and other Apple devices. Description: The Macbook Air offers a large 2.6" full-color display that is sunlight readable. It also has a DVD drive. The comfortable Macbook Air computer has a starting price of only $1349, but you can easily customize the Macbook Air to suit your needs. Description: If you

have one of the MacBook Pro models, you may be interested in the AirPort Extreme wireless network adapter. You can use the integrated router with your home network. The main characteristic of the MacBook Pro is the integrated high-quality AirPort Extreme wireless network adaptor. You can also use it as a small,

compact router. Its wireless performance and durability are unsurpassed. It is also a great value: the price does not include the purchase of an external network adaptor. In this guide, you will learn how to set up your MacBook Pro with wireless access to the Internet and other Apple devices. Description: The Macbook Pro offers a large 2.6" full-color display that is

sunlight readable. It also has a DVD drive. The comfortable Macbook Pro computer has a starting price of only $1699, but you can easily customize the Macbook Pro to suit your needs. Description: This guide will teach you how to set up a dual-OS Leopard MacBook Pro with two operating systems. If you have an older Macbook, you

can take advantage of the Live Discs feature to create a Live OS. Description: This guide will teach

System Requirements:
